

Prelaunch License Sales Workflow SOP + Execution Playbook

ProjectLight CRM | Expanded Playbook Edition | Social Lead to Onboarding

THE OPERATING PROMISE

Every lead has one accountable owner, one documented next action, one exact due time, and one intended outcome - from first signal through onboarding.

Prepared for: Lynked Up Pro Internal Sales Team

Document owner: VP Sales / Revenue Operations

Effective date: July 14, 2026 | Review cycle: every 30 days during prelaunch | Version 3.0

CONFIDENTIAL - DO NOT DISTRIBUTE OUTSIDE LYNKED UP PRO

01

COMMAND CARD: ZERO LEADS LEFT BEHIND

The daily rules every rep, manager, and automation must follow.

OPERATING PROMISE

Every open lead has one owner, one backup owner, one stage, one priority, one exact next action, one due time, and one intended outcome.

NON-NEGOTIABLE	STANDARD
30-minute human response	For qualifying inbound leads received 9:00 a.m.-5:00 p.m. Central Time, a real rep begins a tracked contact attempt within 30 minutes.
After-hours priority	Acknowledge immediately; create a priority task for 8:45 a.m. next business day; first human attempt due by 9:30 a.m. CT.
No blank NEXT	An open record cannot be saved, advanced, or closed from an activity without a named next action and exact due time.
No-answer automation	Selecting No Answer triggers the approved email and, only when SMS-eligible, the approved text within two minutes.
Calendar before goodbye	A verbal follow-up is not a next step. Book the meeting live or create a dated owner task before ending the interaction.
Truth over hype	Separate available, beta, roadmap, excluded, and usage-based items. Never promise results or "everything forever."

Master workflow

Success test: At any moment, leadership can answer: Who owns this lead? What happened last? What happens next? When is it due? What is blocking the sale?

02

ROLES, COVERAGE, AND ACCOUNTABILITY

The queue is a team responsibility; the record is owned by one named person.

ROLE	OWNS	MUST NOT DELEGATE
Sales Rep / SDR	First response, call outcomes, qualification, follow-up, booking, CRM notes.	Accurate disposition and NEXT.
Backup Rep	Takes over when the primary is unavailable or near breach.	Immediate accept/decline with reason.
Sales Manager	SLA board, coverage, coaching, reassignment, stale pipeline.	Same-day recovery of breaches/orphans.
Revenue Operations	Routing, dedup, sequences, templates, dashboards, provider health.	System integrity and rollback.
Leadership	Offer truth, staffing, claims, incentives, executive escalation.	No false urgency or compliance bypass.
Client Success / Onboarding	Closed-won intake, kickoff scheduling, readiness, promise check.	Acknowledgement of every handoff.

Coverage standard

TIME / EVENT	PRIMARY ACTION	CONTROL
8:45 a.m. CT	Opening rep validates phone, email, SMS, calendar, and clears overnight queue.	Manager confirms coverage.
9:00 a.m.-5:00 p.m. CT	Thirty-minute SLA applies to qualifying inbound leads.	Configured as America/Chicago, not fixed UTC-6.
4:30-5:30 p.m. CT	Late coverage stays active so 4:59 p.m. leads receive the full response window.	No early sign-off.
PTO / meeting / outage	Primary becomes unavailable before routing; backup receives the lead.	Shared queue alone is not coverage.
Weekend / company holiday	Immediate acknowledgement; task due first business morning.	Holiday calendar maintained by RevOps.

MANAGER RULE

A breached or orphaned lead remains a management incident until it is reassigned, recovered, and reviewed.

03

LEAD CAPTURE AND PROJECTLIGHT CRM RECORD

Create one canonical record from every identifiable sales signal.

SIGNAL	CREATE / MERGE?	INITIAL PATH
Website or social lead form	YES - High intent	Acknowledge, assign, start 30-minute SLA.
DM, chat, inbound call, referral	YES	Respond in-channel; capture/verify contact data; create NEXT live.
Comment saying "interested," "demo," or "info"	YES when identifiable	Public acknowledgement, compliant private reply, CRM merge.
Checkout started but not paid	YES - Highest priority	Payment-assistance task; same-day rep outreach when allowed.
License purchase completed	YES - CLOSED WON	Verify payment, welcome, leadership/CS alert, onboarding calendar.
Known contact revisits pricing or replies	MERGE + rescore	Pause generic nurture; urgent owner task.
Like, view, impression, anonymous visit	NO sales record	Retarget anonymously; do not invent identity or consent.

Canonical record workflow

Required fields before the record is active

IDENTITY + SOURCE	OWNERSHIP + LIFECYCLE	COMMUNICATION + COMMERCIAL
Name/company; usable phone/email/social ID; original source; latest source; campaign/UTM; form/ad/content.	Primary rep; backup rep; manager; assigned time; stage; priority; score; last activity; NEXT type/owner/due time/outcome.	Timezone; preferred channel; SMS eligibility/source/time; email status; DNC; offer version; checkout/payment state; close/nurture reason.

Dedup rule: Match normalized email, E.164 phone, linked social ID, and open opportunity. Preserve every source event and consent record. Replayed webhooks use idempotency keys so they do not duplicate leads, tasks, messages, or payments.

04

THE 30-MINUTE SLA AND AFTER-HOURS PATH

Automation starts the clock; a real rep completes the human response requirement.

Business-hours inbound: 9:00 a.m.-5:00 p.m. Central Time

TIME	SYSTEM	REP / MANAGER
T+0	Merge/create, score, assign primary + backup, write NEXT and SLA due time.	Rep opens source context.
T+1 min	Send acknowledgement email and eligible SMS; mobile/desktop alert.	Prepare concise first-call reason.
T+15 min	Rep reminder if no logged attempt.	Rep calls immediately.
T+25 min	Manager "at risk" alert.	Manager confirms coverage or triggers backup.
T+30 min	SLA breach flag if no valid human attempt.	Backup takes lead; manager records recovery.
T+45 min	Auto-reassign if still untouched.	Sales Director receives critical alert.

Outside business hours

WHEN	AUTOMATION NOW	NEXT BUSINESS DAY
5:00 p.m.-8:59 a.m.; weekend; approved holiday	Acknowledge receipt, state priority next business day, capture booking option, assign overnight queue.	8:30 digest; 8:45 owner task; first call due by 9:30 a.m. CT.
Prospect requests same-night contact	Route only to an approved on-call rep if coverage exists.	Never promise an unavailable callback.
Lead arrived 4:59 p.m.	Business-hours SLA applies.	Late coverage remains active through 5:30 p.m.

VALID HUMAN ATTEMPT

The rep reviews context, initiates a tracked call from the approved number/dialer, allows a reliable disposition, logs the exact outcome, and confirms NEXT. A task click or bulk email alone does not satisfy the SLA.

05

ALERTS, ESCALATION, AND EXCEPTION COVERAGE

Use real-time alerts for risk; use digests for routine visibility.

TRIGGER	WHO IS ALERTED	REQUIRED RESPONSE
New P0/P1 lead	Primary rep + backup; manager sees live board.	Accept/open lead and start call preparation.
No attempt at 15 minutes	Primary rep.	Call now or request reassignment.
No attempt at 25 minutes	Manager + primary + backup.	Manager confirms owner and calls coverage.
No attempt at 30 minutes	Manager + backup; breach dashboard.	Backup attempts contact; manager logs cause.
No attempt at 45 minutes	Sales Director / leadership critical channel.	Reassign and recover immediately.
Direct purchase / payment success	Rep, manager, leadership digest, CS/onboarding.	Confirm payment and schedule onboarding.
Reply, booking, pricing click, checkout restart	Owner + manager for high score.	Pause generic sequence; human response within 15 minutes.
Provider / connector failure	RevOps + manager on duty.	Use manual fallback and incident ticket.

Exception rules

EXCEPTION	CONTROL
Rep in meeting / PTO / offline	Do not route to unavailable reps. If status changes after assignment, backup accepts the record.
SMS not eligible	Send email only; create a call task. Never silently mark text as sent.
Duplicate lead from another platform	Merge activity and preserve attribution; do not restart the same acknowledgement inside the 30-minute dedup window.
Connector outage	Queue event, export/manual-create critical leads, and backfill after restoration using event IDs.
Alert fatigue	Real-time only for high intent, at-risk SLA, breach, purchase, or failure. Routine activity appears in 8:30 a.m. and 4:45 p.m. digests.
Ownership dispute	Manager assigns one primary owner immediately; compensation rules are resolved separately and never delay contact.

Leadership view: The live dashboard must show leads waiting, oldest wait, SLA at risk, SLA breached, unowned records, missing NEXT, failed messages, purchases waiting for onboarding, and stale opportunities.

06

PIPELINE STAGES AND REQUIRED NEXT ACTIONS

Every stage has an entry condition, exit condition, and mandatory NEXT.

STAGE	ENTRY	EXIT / NEXT
1. New - Unworked	Identifiable inbound event; owner assigned.	Tracked first attempt. NEXT: call due inside SLA.
2. Attempting Contact	At least one valid attempt.	Connected, booked, disqualified, or active cadence. NEXT: exact touch.
3. Connected - Qualifying	Two-way interaction.	Fit/pain/timing/decision path documented. NEXT: demo or dated callback.
4. Demo Scheduled	Accepted calendar event.	Meeting held, rescheduled, or no-show. NEXT: prep + meeting.
5. Demo / Discovery Complete	Pain, impact, desired outcome, stakeholders captured.	Commercial step or nurture. NEXT: review/decision meeting.
6. Commercial Review	Approved offer version shared.	Checkout sent, verbal no, or follow-up event. NEXT: exact decision action.
7. Checkout / Agreement Sent	Valid link/terms delivered.	Payment success, explicit decline, or agreed hold. NEXT: payment review.
8. Closed Won - Onboarding Pending	Payment/terms verified.	Onboarding accepted and implementation owner assigned. NEXT: kickoff.
9. Nurture	Fit exists; not active now.	Reactivated or closed. NEXT: dated value touch tied to reason.
10. Closed Lost	Definitive no/no fit/unresponsive after policy.	Reason code and learning note; optional future date if truly appropriate.

Stage hygiene controls

CONTROL	STANDARD
No NEXT	Stage save blocked or red exception task created; manager alerted.
Overdue NEXT	Red queue immediately; manager after 15 minutes; reassignment by policy.
Stage aging	Manager reviews open deals with no meaningful activity for five business days.
Date pushing	A due date cannot be moved repeatedly without a new customer commitment or manager reason.
Feature dependency	Record required capability and current status; never substitute a roadmap promise for an exit criterion.

07

IMMEDIATE RESPONSE AND NO-ANSWER AUTOMATION

The first 30 minutes should feel fast, personal, and coordinated - never robotic.

Inbound response flow

CALL OUTCOME	SYSTEM ACTION	REP NEXT
Connected - qualified	Pause prospecting; send booking confirmation if scheduled.	Complete discovery fields and book next step live.
Callback requested	Send short confirmation.	Create exact date/time task; repeat context.
No answer / voicemail	Email + eligible SMS within two minutes; log attempt; no duplicate sends.	Optional 15-25 second voicemail; confirm next call.
Wrong number / carrier error	Suppress bad channel; create Data Repair.	Use approved email/social path or close invalid data.
Not now	Pause active cadence; enter reason-based nurture.	Capture event and exact reactivation date.
Not interested / STOP	Cancel active sequence; apply suppression.	Close respectfully; no persuasion after opt-out.
Purchase completed	Welcome + handoff + onboarding workflow.	Congratulate and confirm kickoff.

Voicemail - first attempt (15-25 seconds)

Intent: Create recognition and point the prospect to the easier reply channels; do not pitch features.

Warm, calm: "Hey [First Name], this is [Rep] with Lynked Up Pro. You just [requested information / asked about the prelaunch license], and I wanted to respond while it was fresh."

Close: "I will send a quick text and email so you can choose the easiest way to connect. My number is [phone]."

Automation safety: Any inbound reply pauses promotional sequence steps and creates an urgent owner task. Logistics reminders may continue only when relevant to an accepted meeting or purchase.

08

14-DAY ACTIVE CADENCE AND LONG-TERM NURTURE

Persistent, relevant, and respectful - no random "just checking in" messages.

TIMING	PRIMARY TOUCH	MESSAGE PURPOSE / BRANCH
T+0	Call + acknowledgement	Respond while interest is fresh. Connected/reply pauses the generic cadence.
T+2-3 hours	Second call	High-intent recovery inside safe local calling hours.
Next business morning	Call + personalized email	Reference source and likely problem; offer one clear next step.
Day 2	SMS or social reply	Short, human, channel-appropriate question.
Day 3	Call + value email	Share one relevant workflow insight; not a feature brochure.
Day 5	Personal video or tailored note	Use approved proof or screen example; never fabricate outcomes.
Day 7	Call + decision note	Ask whether to meet now, revisit later, or close the loop.
Day 10	Manager/founder touch for strategic leads only	Transparent prelaunch invitation; no executive spam.
Day 14	Final active-cycle call + close-loop email	Move to nurture or Closed Lost with reason and future date when appropriate.

Long-term nurture

CONTROL	DEFAULT
Channel eligibility	No SMS or marketing email without the approved status/source. Suppression always wins.
Quiet hours	8:00 a.m.-9:00 p.m. recipient local time unless stricter policy applies.
Frequency	No more than one automated SMS per day in this SOP; avoid stacking calls, texts, and emails inside a short window.
One CTA	Reply, book, review terms, complete checkout, or reschedule - one primary action per message.
Reactivation	Reply, direct question, booking, pricing/checkout activity, or relevant product milestone returns the lead to an active owner.

09

CALENDAR, MEETING, REMINDER, AND NO-SHOW SOP

A meeting is real only when the invite is accepted, synced, and visible in ProjectLight.

Calendar setup - mandatory for every rep

REQUIREMENT	STANDARD
Approved booking link	Connected to the rep calendar with two-way sync; included in email, SMS, DMs, proposals, and forms.
Availability	Correct working hours, PTO, holidays, buffer time, minimum notice, and max meetings/day.
Timezone	Automatic detection; display Central Time when manually confirming.
Meeting types	15-minute fit call, 30-minute demo, 30-minute decision review, 60-minute onboarding.
Event content	Purpose, agenda, meeting link, contact details, company, CRM record ID, assigned rep, cancellation/reschedule link.
Testing	Desktop/mobile test, double-book test, reminder test, CRM event creation, and fallback owner.

Booking flow

EVENT	AUTOMATION	HUMAN ACTION
Booked	Immediate email + eligible SMS; calendar invite; prep task.	Confirm purpose, attendees, and outcome.
24 hours before	Reminder + reschedule link.	Review discovery notes.
2 hours before	Short logistics reminder.	Prepare tailored demo path.
15 minutes before	Internal rep alert only.	Open record and meeting room.
No-show at +10 minutes	Email/SMS rebook message; mark no-show.	Call once, then create 24-hour rebook task.
Calendar sync failure	Incident + manual fallback task.	Send manual invite before ending contact.

Naming standard: [LUP Demo] Company - First Last | [LUP Decision] Company - First Last | [LUP Onboarding] Company - License/Team

10

HUMAN CALL DELIVERY AND OPENING

Use anchor language, not a robotic monologue. Sound calm, curious, and prepared.

ELEMENT	DELIVERY STANDARD
Tone	Warm confidence. Professional, fast, calm - never frantic or overly "salesy."
Energy	About 10% above the prospect; match pace without copying stress or negativity.
Pace	Conversational. Slow down on important points and after questions.
Inflection	Use a grounded downward finish on clear statements; avoid sounding unsure or sing-song.
Listening	Aim to listen more than talk. Ask one question at a time and allow silence.
Language	Use the prospect's words. Avoid jargon, feature dumping, and "just checking in."
Demeanor	Smile before dialing, sit/stand tall, take notes, and sound genuinely pleased they raised a hand.

First call - permission and curiosity opener

Intent: Lower resistance, connect the call to the prospect's action, and invite a real conversation.

Warm recognition: "Hi [First Name], this is [Rep] with Lynked Up Pro. You just [filled out the form / messaged us / started the Founders License checkout]."

Permission: "Did I catch you with two minutes?"

Curiosity - pause after this: "What caught your attention, or what was happening in the business that made you raise your hand today?"

Set an upfront contract

Intent: Make the conversation safe and mutual; remove the fear of a surprise pitch.

Set the frame: "I am not going to dump a software pitch on you. I will ask a few questions, tell you honestly where we fit and where we do not, and then we can either book a 30-minute demo, set a later follow-up, or close the loop. Fair?"

If they are busy: "Totally fair. Is your main interest lead follow-up, project visibility, or the prelaunch license? Great - let's lock a better time. Is morning or afternoon easier?"

Do not read word-for-word: Keep the intent and structure. Use natural contractions, pauses, and the prospect's language. The best call sounds like a prepared human, not a recited script.

11

DISCOVERY PLAYBOOK: DIAGNOSE BEFORE DEMONSTRATING

Combine SPIN-style questions, Sandler-style mutual qualification, Gong-style pacing, and tactical empathy.

Conversation map

Core questions - choose the relevant 11-14, do not rapid-fire all of them

AREA	HUMAN QUESTIONS
Trigger	"What made this worth looking at now?" "What did you see that felt relevant?"
Current workflow	"Walk me through a lead from first inquiry to paid job." "Where do reps and office staff work today?"
Problem	"Where does that process break most often?" "What gets missed, delayed, or duplicated?"
Impact	"When that happens, what does it cost in time, jobs, margin, or owner attention?" "Who feels it most?"
Frequency / urgency	"How often does that happen?" "What happens if nothing changes in the next six months?"
Past attempts	"What have you tried?" "Why did it not stick?"
Adoption	"What would make your reps actually use a new system?"
Success	"Ninety days after rollout, what must be visibly better for you to call this a win?"
Decision path	"Who else needs to be comfortable?" "How will you compare options and make the decision?"
Timing / economics	"Is there a deadline or budget window?" "What level of problem is worth solving now?"
Risk	"What makes you cautious about a prelaunch platform?"
Next step	"If the demo proves the right things, what happens next?"

Discovery summary before the demo

Intent: Prove that you listened and get permission to tailor the demonstration.

Reflect: "Let me make sure I have this right. You are dealing with [problem], it creates [impact], and the priority is [desired outcome] by [timing]. The people involved are [stakeholders]. Did I miss anything important?"

Transition: "Then I will show only the workflows tied to those outcomes, and I will be clear about what is live, beta, or roadmap."

12

DEMO PLAYBOOK AND FOUNDERS LICENSE POSITIONING

Turn the product into a workflow story; do not tour every menu.

30-minute demo agenda

MINUTES	FOCUS	REP BEHAVIOR
0-3	Confirm agenda and decision outcome.	Restate the problem and ask permission to adjust.
3-7	Current-state recap.	Use the prospect's language; confirm priority.
7-22	Tailored workflow demo.	Show 2-4 relevant moments, not every feature. Ask check-in questions.
22-26	Fit, risk, and feature status.	Label LIVE / BETA / ROADMAP / NOT INCLUDED.
26-29	Commercial path.	Use only the approved Offer Data Sheet.
29-30	Decision or scheduled next step.	Book it live; send the invite before goodbye.

The Lynked Up Pro workflow story

STATUS LABEL	REP LANGUAGE
LIVE	"This is available in the current configuration we are reviewing."
BETA	"This is being used in a controlled early stage; scope and behavior may change."
ROADMAP	"This is planned, not a purchase promise. We will not attach a guaranteed date unless it is written in the approved terms."
USAGE / THIRD PARTY	"This may carry separate SMS, email, data, AI, scan, payment, or provider charges under the terms."
NOT INCLUDED	"That is outside this offer/configuration. Let's decide whether it is truly required."

Founders / Prelaunch License positioning

Intent: Create legitimate urgency through transparency, not pressure.

Position: "The Founders License is limited early access before standard pricing and public availability, under the written terms."

Truth: "It does not mean every future feature forever. I will show the exact included core features, current status, limits, and any usage-based items."

Fit check: "The question is whether the current value and early-access terms solve enough of your priority now - not whether every roadmap idea is finished."

13

COMMERCIAL REVIEW, CLOSE, AND NEXT-STEP CONTROL

Close the gap between interest and a real decision without forcing the buyer.

Fit summary formula

PROBLEM + IMPACT + DESIRED OUTCOME + FIT + HONEST LIMITATION + DECISION

"You told me [problem] is creating [impact]. The outcome you want is [goal]. The strongest fit is [2-3 workflows]. The limitation to be clear about is [status/risk]. What feels unresolved?"

Commercial flow

ONBOARDING

Decision ask

Intent: Invite a clear yes/no and surface the real barrier.

Ask: "Assuming the written terms match what we reviewed, are you comfortable reserving the license today?"

If hesitation: "It sounds like there is still a risk we have not resolved. What would need to be true for this to feel like a smart decision?"

If yes: "Great. I will stay with you through the checkout, then we will book onboarding before we end."

PROSPECT RESPONSE	REQUIRED NEXT ACTION
Ready to buy	Send approved checkout; remain available; verify payment event; move to Closed Won - Onboarding Pending.
Needs another stakeholder	Book a decision meeting with required attendees; send one-page recap and terms.
Needs time	Ask what specifically must be evaluated; set an exact decision date and owner.
Budget/timing later	Capture budget event; enter reason-based nurture with a dated reactivation.
No fit / no	Close respectfully with reason; do not force nurture.
Feature dependent	Record exact capability and status; no roadmap promise; schedule only if a real future review event exists.

Commercial truth: Price, quantity, payment options, license limits, implementation expectations, refund/cancellation terms, included features, variable charges, and scarcity language must come from the current approved Offer Data Sheet - never memory or improvisation.

14

OBJECTION HANDLING I: CLARIFY BEFORE RESPONDING

Listen > Label > Explore > Respond > Confirm > Schedule.

TACTICAL EMPATHY

Do not "overcome" the buyer. Name the concern without judgment, ask a calibrated question, answer only the real issue, and confirm what remains.

OBJECTION	HUMAN RESPONSE	NEXT
"It costs too much."	"It sounds like the investment feels ahead of the value right now. Compared with what - budget available, alternatives, or the cost of the current problem?" Then quantify the impact using the prospect's own facts; never invent ROI.	Reconfirm value, payment path, or close/nurture.
"We already have a CRM."	"That makes sense. I would not replace a working system without a reason. Where does it still break between lead, follow-up, field proof, production, or owner visibility?"	Define the gap; demo only the gap.
"Send me information."	"Happy to. So I send something useful, which issue should it help you evaluate? And when should we spend 15 minutes deciding whether it is relevant?"	Send tailored asset + calendar.
"I need to think about it."	"Of course. Usually that means fit, timing, money, trust, or another person. Which one deserves the thinking?"	Book decision event around the real issue.
"I need my partner/team."	"Absolutely. What will they care about most, and what would make the next conversation productive for them?"	Book with stakeholders; add agenda.

Rep self-check after any objection

ASK YOURSELF	YES / NO
Did I label the concern without arguing?	
Did I ask one question before presenting?	
Did I answer the stated issue with approved facts?	
Did I confirm what remains unresolved?	
Did we schedule a real next action?	

15

OBJECTION HANDLING II: PRELAUNCH TRUST AND ADOPTION

Be strongest where early-stage software is naturally questioned: maturity, readiness, adoption, and implementation.

OBJECTION	HUMAN RESPONSE	NEXT
"You are a new company."	"That is a fair risk to examine. Which part worries you most - continuity, support, security, feature maturity, or implementation?" Review only approved evidence and terms.	Document risk and evidence required.
"That feature is not live."	"You are right to separate today from roadmap. Is that capability a must-have for the decision, or would the current workflow create enough value without it?"	No promise; close, nurture, or proceed on current value.
"My reps will not use it."	"What have they rejected before, and why?" Show the smallest role-specific workflow, required behaviors, training, and manager controls.	Define adoption plan and owner.
"We do not have time to implement."	"What would make implementation feel manageable?" Separate prelaunch license purchase from the actual onboarding plan; set realistic scope.	Book onboarding/readiness session.
"We are comparing competitors."	"Good. What decision criteria matter most?" Compare workflows and fit, not insults or unsupported claims.	Create side-by-side criteria and decision date.
"What if the launch slips?"	"Let's rely on the written terms and current feature status, not a verbal promise. What timing dependency would make delay unacceptable?"	Escalate contractual question; do not improvise.
"What about usage fees?"	"Let's itemize what is included and what may vary - SMS, email, data, advanced AI, scans, payments, or third-party services - using the approved sheet."	Confirm cost model in writing.

Close-lost / nurture reason codes

Learning standard: Every Closed Lost record captures the decisive reason, the prospect's wording, the offer/version discussed, the competing option when known, and a future event only when one truly exists.

16

EMAIL TEMPLATES: FIRST RESPONSE AND BOOKING

Personalize the first line; keep one CTA; do not hide feature status or pricing terms.

EMAIL 1 | Immediate form confirmation

Subject: We received your Lynked Up Pro request
Hi [First Name],

Thanks for reaching out about Lynked Up Pro and the Prelaunch / Founders License. I am reviewing your request now and will call you shortly from [number].

The goal is simple: understand what caught your attention, see whether the platform fits your workflow, and give you an honest next step.

Prefer to choose a time? [Booking Link]

[Rep Name] | Lynked Up Pro

EMAIL 2 | After-hours acknowledgement

Subject: You are in our priority follow-up queue
Hi [First Name],

We received your request after today's live sales hours. Your lead is in our priority queue for the next business morning, and a rep will make the first call by 9:30 a.m. Central Time.

You may also choose a time here: [Booking Link]

Thank you,
Lynked Up Pro

EMAIL 3 | No answer after call

Subject: Tried you - quick Lynked Up Pro follow-up
Hi [First Name],

I just tried you regarding your interest in Lynked Up Pro. No problem if the timing was off.

What caught your attention most: lead follow-up, sales visibility, project operations, or the Prelaunch / Founders License?

Reply here or choose a time: [Booking Link]

[Rep Name]

EMAIL 4 | Demo confirmation

Subject: Confirmed: Lynked Up Pro demo - [Date/Time]
Hi [First Name],

You are confirmed for [Date] at [Time] [Timezone].

We will focus on: [Problem 1], [Problem 2], and whether the current Prelaunch / Founders License terms fit your team. I will clearly label what is live, beta, roadmap, or outside the offer.

Join: [Meeting Link] | Reschedule: [Link]

[Rep Name]

17

EMAIL TEMPLATES: ADVANCE, DECIDE, AND ONBOARD

Each email should move the buyer to one clear outcome.

EMAIL 5 | Demo recap and decision step

Subject: Recap and next step for [Company]

Hi [First Name],

You shared that [problem] is causing [impact], and the priority is [desired outcome] by [timing]. The strongest fit we reviewed was [workflow 1] and [workflow 2].

Important limitation/status: [live / beta / roadmap / not included].

Next step: [Decision Review] on [Date/Time]. [Calendar Link]

[Rep Name]

EMAIL 6 | Checkout / commercial follow-up

Subject: Lynked Up Pro license terms and secure checkout

Hi [First Name],

Here is the approved Prelaunch / Founders License checkout and written terms: [Secure Link].

Please review the included features, license limits, implementation expectations, variable/third-party charges, and cancellation/refund terms.

Reply with any question before completing payment.

Our agreed decision time is [Date/Time].

[Rep Name]

EMAIL 7 | Close the loop / recycle

Subject: Should I keep this active?

Hi [First Name],

I have tried to connect because you asked about Lynked Up Pro. I do not want to create noise.

Which is most accurate?

1 - Book a conversation

2 - Revisit on [Month/Date]

3 - Close the loop

Reply with 1, 2, or 3. If I do not hear back, I will move this out of the active follow-up queue.

[Rep Name]

EMAIL 8 | Closed won - welcome and onboarding

Subject: Welcome to Lynked Up Pro - schedule onboarding

Hi [First Name],

Welcome to Lynked Up Pro. Your Prelaunch / Founders License payment has been verified.

The next step is a 60-minute onboarding kickoff with [Onboarding Lead]. Choose a time here: [Onboarding Link].

Before the call, please complete: [Pework Link]. We will confirm users, priorities, integrations, timeline, and the commitments made during sales.

[Rep Name] + [Onboarding Lead]

18

SMS TEMPLATE LIBRARY

Short, conversational, permission-aware, and tied to one action.

TRIGGER	APPROVED TEMPLATE
Immediate inbound	Hi [First Name] - [Rep] with Lynked Up Pro. I received your [form/message] and will call shortly from [number]. Prefer a time? [Link]. Reply STOP to opt out.
After hours	Thanks for reaching out to Lynked Up Pro. You are in our priority queue for the next business morning. Choose a time: [Link]. Reply STOP to opt out.
No answer	Hi [First Name], I just tried you about Lynked Up Pro. What caught your attention most - follow-up, operations, or the Founders License? [Rep] [Link]
Callback confirmed	Confirmed - I will call [Day] at [Time] [TZ] from [number]. If anything changes, reply here. - [Rep]
Demo booked	You are set for the Lynked Up Pro demo on [Day] at [Time] [TZ]. Join: [Link] Reschedule: [Link]
Two-hour reminder	Reminder: Lynked Up Pro demo today at [Time] [TZ]. We will focus on [priority]. Join: [Link]
No-show	Hi [First Name], we missed you at the Lynked Up Pro demo. No worries - rebook here: [Link], or reply with a better day.
Decision / checkout	I sent the approved license terms and secure checkout. What question needs to be resolved before [agreed decision time]? - [Rep]
Closed won	Welcome to Lynked Up Pro. Payment is confirmed. Schedule onboarding here: [Link]. Your onboarding lead is [Name].
Breakup	Should I keep this active? Reply 1 = book, 2 = later, 3 = close. - [Rep], Lynked Up Pro

SMS GATE

Automated texts run only when the record has an approved eligibility/consent basis and is inside allowed hours. STOP, unsubscribe, complaint, invalid number, or do-not-contact suppresses queued sales texts immediately. Legal/Compliance owns final rules.

Reply handling: Any reply pauses the generic sequence and creates an urgent owner task. Do not continue automated persuasion while a human conversation is active.

19

CLOSED-WON HANDOFF AND ONBOARDING

The sale is not complete until the customer has an accepted kickoff and a named implementation owner.

Closed-won flow

PATH	IMMEDIATE ACTION
Direct online purchase	Verify payment/terms event; create Closed Won - Onboarding Pending; assign AE + onboarding lead; send welcome and scheduling link.
Rep-assisted purchase	Stay with buyer through checkout; verify success; confirm email/phone; schedule onboarding live.
Payment pending / failed	Do not mark Closed Won. Create Payment Assistance task and send secure recovery link.
Refund/cancellation request	Escalate under written terms; freeze expansion messaging; keep auditable history.

Required internal handoff

FIELD	REQUIRED CONTENT
Commercial truth	Offer version, quantity, payment state, approved exceptions, variable charges discussed.
Business case	Problems, impact, desired 90-day outcome, success measures, urgency.
Stakeholders	Decision maker, admin, users, technical/financial contacts.
Product scope	Live features purchased; beta/roadmap discussion; explicit exclusions; integrations.
Promises / risk	Every commitment made, unresolved concern, adoption risk, deadline.
Kickoff	Accepted date/time, onboarding owner, prework status, meeting link.

Onboarding calendar invite description

Intent: Set clear expectations and prevent the customer from repeating the sales story.

Purpose: Confirm users, priorities, configuration, data/integrations, timeline, training, and success measures.

Bring: Decision maker or admin, user list, current tools, priority workflow, required integrations, and open questions.

Outcome: Approved onboarding plan with owners, milestones, next meeting, and risks.

20

LEADERSHIP DASHBOARD AND OPERATING RHYTHM

Manage the system with leading indicators, funnel outcomes, and quality controls.

KPI	LAUNCH STANDARD / VIEW
NEXT completeness	100% of open leads and opportunities.
30-minute SLA	At least 95% during business hours; every miss has cause + recovery.
Median first human attempt	Track by source, rep, day, and hour.
Contact / booking / show rates	Trend by source and rep; do not hide poor-quality lead sources.
Demo-to-license and lead-to-license	By cohort, offer version, source, segment, and rep.
Pipeline aging	Zero unowned; zero active leads without NEXT; stale-stage count and value.
Message quality	Delivery, bounce, opt-out, complaint, reply, and failure rates.
Onboarding handoff	100% of paid licenses assigned and kickoff scheduled within one business day.
Forecast confidence	Decision date, stakeholder, next event, risk, and evidence for every forecast deal.

Operating rhythm

CADENCE	MEETING / REVIEW	OUTPUT
Daily 8:45 a.m.	Overnight queue + coverage check.	Owners confirmed; priority calls started.
Daily noon	SLA risk and failed-automation review.	Breaches recovered; failures assigned.
Daily 4:45 p.m.	Stale/overdue NEXT sweep.	No lead left without a dated action.
Weekly Monday	Pipeline, source quality, forecast.	Stage cleanup and decisions.
Weekly Wednesday	Call coaching using recordings/notes where permitted.	One behavior commitment per rep.
Weekly Friday	Win/loss, opt-out, complaint, nurture reactivation.	Process and message changes.
Monthly	Cross-functional post-mortem.	Approved SOP/config revisions and tests.

Coaching scorecard: Opening/context, agenda contract, question quality, listening, problem/impact depth, tailored demo, feature-status honesty, objection diagnosis, clear ask, and scheduled NEXT.

21

COMPLIANCE, QA, AND AUTOMATION FAILURE RUNBOOK

A fast sales process must also be permission-aware, auditable, and resilient.

CONTROL AREA	MINIMUM STANDARD
Commercial email	Accurate sender/subject, business identity and physical address, clear opt-out, suppression process, and vendor monitoring.
SMS	Document approved eligibility/consent basis; identify sender; honor STOP/HELP and quiet hours; suppress immediately; legal review by jurisdiction.
Calling / recording	Use approved numbers and scripts; follow calling-hour, DNC, and recording-consent rules.
Offer truth	Only approved price, terms, feature status, claims, and scarcity. Material statements remain in the CRM recap.
Data access	Role-based permissions, minimum necessary data, audit logs, secure links, no card data in notes.
AI use	AI may suggest messages, scores, summaries, and next actions; a qualified human reviews consequential outputs.

Failure runbook

FAILURE	FALLBACK	OWNER / SLA
Social/form connector down	Export or manually create critical leads; retain original event ID; backfill after recovery.	RevOps - immediate.
SMS/email provider failure	Retry safely once; do not duplicate; create call/manual email task; flag dashboard.	RevOps + manager.
Calendar sync failure	Send manual invite and record URL; repair same business day.	Rep + Systems Admin.
Payment webhook missing	Verify in gateway; do not mark won on assumption; create finance/RevOps task.	RevOps - immediate for buyer present.
Duplicate sends / automation loop	Pause sequence globally if needed; suppress contact; investigate event/idempotency trail.	RevOps incident lead.
Wrong timezone / holiday rule	Use America/Chicago + recipient timezone; correct tasks and notify affected leads.	RevOps + manager.

Release gate: No automation goes live without test leads for business hours, after hours, duplicate event, reply suppression, opt-out, bad phone, bounced email, rep unavailable, purchase success, payment failure, calendar failure, and rollback.

22

POST-MORTEM GAP REVIEW: WHAT COULD STILL FAIL?

Treat these as launch gates, not footnotes. Each risk needs an owner, test, and evidence.

GAP / FAILURE MODE	CONTROL	OWNER
Offer facts are not finalized; reps improvise price, terms, or scarcity.	Approved versioned Offer Data Sheet; CRM requires version; call audits.	Leadership + Legal
Live/beta/roadmap status is inconsistent.	Product status matrix with owner and update date; demo labels.	Product + RevOps
Social forms create duplicates or lose attribution.	Canonical identity rules, immutable original source, event IDs, daily dedup audit.	RevOps
30-minute SLA fails near 5:00 p.m., PTO, or holidays.	Late coverage, backup owner, America/Chicago logic, holiday calendar tests.	Sales Manager
Automations continue after reply, purchase, opt-out, or complaint.	Global reply/purchase/suppression stops with queue cancellation tests.	RevOps + Compliance
No-answer SMS is sent without approved basis.	SMS eligibility gate; email/call fallback; consent audit.	Compliance
Managers receive too many alerts and ignore critical ones.	Severity tiers; real-time only for risk/breach/purchase/failure; digests for routine.	Sales Manager
Calendar link breaks or double-books.	Weekly synthetic booking test; manual invite fallback; same-day repair.	Systems Admin
Sales promise does not match onboarding delivery.	Required promise/exclusion field; CS accepts/rejects handoff; call-note audit.	AE + CS
Payment success is assumed from checkout intent.	Gateway verification required before Closed Won; recovery path for failed/pending.	RevOps + Finance
Nurture becomes spam or has no reactivation logic.	Reason-based segments, frequency/quiet-hour controls, dated human trigger.	Marketing + Sales
Metrics disagree across dashboards.	Written KPI definitions, event timestamps, source-of-truth audit, versioned reports.	RevOps

TOP LAUNCH BLOCKERS

Do not go live without: (1) approved offer/feature truth, (2) staffed primary + backup coverage, (3) consent/suppression controls, (4) tested reply/purchase stops, (5) payment and calendar verification, and (6) a manual fallback for connector failure.

Post-mortem question: For every missed or mishandled lead ask: What signal entered? What should the system have done? What did the human do? Where did detection fail? Which control changes - process, staffing, data, message, or software?

23

GO-LIVE CHECKLIST, APPROVALS, AND METHOD BASIS

Launch only when the operating system, people, offer, and fallbacks are ready.

GO-LIVE GATE	PASS EVIDENCE	STATUS
Offer Data Sheet approved	Price, quantity, limits, terms, feature status, usage charges, claims, scarcity.	—
Owners and backups loaded	Rep schedules, PTO, holidays, manager-on-duty, late coverage.	—
All lead sources tested	Forms, DMs, chat, calls, referrals, checkout, purchase.	—
Zero-Orphan validator tested	Owner, backup, stage, priority, NEXT, due time, intended outcome.	—
30-minute SLA alerts tested	15/25/30/45-minute paths and reassignment.	—
Email/SMS approved	Templates, sender identity, consent/eligibility, STOP/unsubscribe, quiet hours.	—
Calendar tested	Booking, sync, reminders, no-show, manual fallback, onboarding invite.	—
Payment tested	Success, pending, failed, duplicate webhook, refund/cancellation escalation.	—
Dashboards reconciled	SLA, NEXT, source, funnel, quality, onboarding metrics.	—
Team certified	Role-play opening, discovery, demo, objections, close, CRM disposition.	—
Incident owner named	Connector, provider, calendar, payment, duplicate-send response.	—
30-day post-mortem booked	Cross-functional review on calendar with data owner.	—

Approval

ROLE	NAME	SIGNATURE / DATE

Client Success / Onboarding		

Method and source basis

Method: Huthwaite SPIN; Sandler; Gong; Black Swan Group; FTC commercial-email guidance; and counsel-reviewed SMS/calling rules. Internal basis: Lynked Up Pro Website FAQ (July 14, 2026), Web Lead Management SOP v3 (April 10, 2026), competitive audits (May 20, 2026), and Time Kills Deals (July 11, 2026). Product and commercial facts always defer to the latest approved source. Proof builds trust. Speed creates momentum. Consistent follow-up closes deals.

24

PART II - SALES EXECUTION PLAYBOOK

| Manager setup, CRM build, scripts, cadences, and coaching

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

Purpose: Part I defines the operating rules. Part II turns those rules into a build plan, a manager system, a complete contact sequence, and human sales conversations the team can actually use.

BUILD IT

Roles, data, integrations, routing, alerts, stages, calendar, and payment.

RUN IT

Manager coverage, queue control, coaching, reporting, and change management.

SAY IT

Calls, voicemails, SMS, email, discovery, demo, objections, and close.

IMPROVE IT

Acceptance tests, post-mortems, scorecards, and controlled experiments.

THE LYNKED UP PRO CONVERSATION METHOD

Method element	How the team uses it
Up-front agreement	Set purpose, time, agenda, and a truthful possible outcome before discovery.
Current state -> gap -> future state	Understand what happens today, the business impact, and what must be different.
SPIN-style diagnosis	Use situation sparingly; explore problem, implication, and desired payoff.
Tactical empathy	Label concerns, summarize accurately, and ask calm calibrated questions.
Teach, tailor, take control	Offer one relevant insight, connect it to the buyer, and guide a clear decision path.
No-pressure qualification	A clear no is better than a fake maybe. Protect trust and keep the pipeline truthful.

Playbook rule: Use the scripts as conversation scaffolding. Never sound like you are reading. Listen for the buyer's exact words, slow down, and make the next question feel earned.

25

IMPLEMENTATION OWNERSHIP

Who builds, approves, runs, and improves the system

Workstream	Sales Manager	ProjectLight / RevOps	Other owner / approval
Offer truth	Train to the approved offer and stop improvisation.	Version offer fields, templates, and expiration dates.	Product + Finance + Leadership approve.
Coverage	Set rep schedules, backups, PTO, holidays, and 5:30 PM late coverage.	Load availability, capacity, round-robin, and fallback rules.	Leadership funds staffing.
Lead intake	Define which signals are P0/P1/P2 and who owns each.	Connect sources, validate payloads, dedupe, preserve attribution.	Marketing owns source forms and consent copy.
SLA	Enforce the 30-minute standard and intervene before breach.	Calculate clocks, create tasks, alert, reassign, and audit.	Leadership receives systemic breaches.
Messaging	Approve tone, coach personalization, audit quality.	Build versioned templates, eligibility gates, stop rules, logs.	Compliance / Legal approves channel rules.
Pipeline	Define stage entry/exit evidence and aging limits.	Block invalid moves; require NEXT; create exception queues.	Finance / CS approve commercial and handoff stages.
Calendar	Set meeting types, host coverage, buffers, and no-show standards.	Sync calendars, event IDs, reminders, reschedule, and fallback.	Customer Success owns onboarding calendar.
Reporting	Run daily queue and weekly funnel reviews; coach from evidence.	Build dashboards, reconcile metrics, and surface data gaps.	Leadership reviews weekly/monthly.

BUILD SEQUENCE - DO NOT AUTOMATE CHAOS

1	Manager	Approve offer, promises, stages, owner model, coverage hours, and service levels.
2	RevOps	Build data model, permissions, source adapters, dedupe, and canonical activity timeline.
3	Manager + RevOps	Configure routing, SLA timers, alerts, task rules, and stage gates.
4	Compliance	Approve forms, consent evidence, sender identities, opt-outs, quiet hours, and retention.
5	RevOps	Build sequences, calendar, payment, onboarding, dashboards, and outage queues.
6	Manager	Train and certify reps on calls, CRM dispositions, next actions, and escalation.
7	Cross-functional	Run end-to-end acceptance tests with real test records and evidence.
8	Leadership	Approve go-live, monitor first 10 business days, and require a 30-day post-mortem.

Single accountable owner: Every implementation item has one accountable owner, one due date, one acceptance test, and one escalation path. Shared ownership without a named decision-maker is not ownership.

26

SALES MANAGER SETUP AND OPERATING RHYTHM

| The manager makes the system real

PRELAUNCH SETUP COUNTDOWN

When	Sales manager action	Evidence of completion
T-30 to T-21 days	Approve offer sheet, target customer, qualification standard, stages, coverage, territories, and backup rules.	Signed sales design + staffing calendar.
T-20 to T-14 days	Approve scripts, cadence objectives, templates, dispositions, objection responses, and escalation language.	Controlled template library and role-play plan.
T-13 to T-7 days	Run role plays; certify first call, discovery, demo, close, no-show, payment recovery, and CRM hygiene.	Scorecards at or above certification threshold.
T-6 to T-2 days	Run live-source tests, inspect dashboards, verify late-day coverage, and rehearse manual fallback.	Passed acceptance test packet.
T-1 day	Freeze noncritical changes, confirm on-call owners, publish queue coverage, and open launch command channel.	Launch roster + escalation contacts.
Launch + 10 days	Inspect every breach, sample messages/calls daily, correct routing, and celebrate verified wins.	Daily launch log + corrective actions.

DAILY, WEEKLY, AND MONTHLY MANAGER RHYTHM

Cadence	Meeting / review	Required output
8:45 AM daily	10-minute launch huddle: wins, priority queue, coverage, demos, payments, blockers.	Named owners for every P0/P1 and one team focus.
11:30 AM daily	SLA and stale-task sweep.	Reassignments, capacity fixes, and coaching moments.
4:30 PM daily	Late-day coverage, payment, no-show, and onboarding sweep.	No unowned overnight blocker; 5:30 PM coverage confirmed.
Weekly	Funnel, source quality, stage aging, objections, calls, and forecast.	Three corrective actions with owner/date.
Biweekly	Individual coaching and call review.	One behavior to keep, one to change, one practice assignment.
Monthly	Workflow, template, compliance, deliverability, staffing, and post-mortem review.	Approved version changes and retest plan.

FUN, NOT FLUFF Celebrate a great question, a clean no, and a perfect handoff - not just revenue.	COACH THE MOMENT Use exact call timestamps and CRM events; avoid vague advice.	PROTECT THE BUYER No fake scarcity, pressure, or roadmap promises.	PROTECT THE REP Clear coverage, fast answers, and fair lead distribution.
--	--	--	---

27

PROJECTLIGHT CRM MUST-HAVE FEATURES

| Launch blockers, force multipliers, and future intelligence

P0 - REQUIRED BEFORE THE INTERNAL SALES TEAM CAN RELY ON PROJECTLIGHT

Must-have capability	Minimum acceptance standard
Universal lead intake	API/webhook/manual intake for forms, DMs, chat, calls, referrals, checkout, and purchases; raw source event retained.
Canonical identity + dedupe	Match source ID, normalized email, E.164 phone, company/domain, social ID, and transaction ID; preserve merge history.
Ownership + backup	Primary rep, backup, manager, assignment/acceptance timestamps, capacity, PTO, and automatic fallback.
Next-action enforcement	Non-terminal record cannot save or advance without action type, owner, date/time, purpose, and intended outcome.
SLA clock + alerts	America/Chicago business clock, recipient-local contact rules, T+15/T+25/T+30/T+45 alerts, breach reason, and reassignment.
Two-way communications	Email, SMS, call, voicemail, social/DM note, reply detection, delivery status, and a single chronological timeline.
Consent + suppression	Permission evidence, quiet hours, opt-out/DNC, invalid/bounce, global suppression, frequency caps, and auditable stop reasons.
Sequence orchestration	Event-based steps; pause on reply; replace CTA on booking; stop on payment/opt-out; idempotency and dedup.
Calendar engine	Round-robin/pool availability, timezone, event IDs, reminders, reschedule, cancel, no-show, and onboarding scheduling.
Payment + onboarding	Checkout state, verified payment, unique transaction handling, Closed Won, presale suppression, customer/license, and handoff tasks.
Dashboards + exceptions	SLA, next-action coverage, stage aging, source funnel, messages, appointments, payment, onboarding, breaches, and outages.
Security + audit	Role permissions, template/version history, immutable activity events, exports, retention controls, and incident evidence.

P1 AND P2 ROADMAP

P1 - SALES EFFICIENCY	P1 - MANAGER CONTROL	P2 - AI ASSIST	P2 - OPTIMIZATION
Power dialer, voicemail workflow, lead scoring, snippets, saved views, task queues, mobile push, call recording with approved consent.	Conversation review, QA sampling, routing simulation, template approval, capacity forecast, source/rep benchmarking.	Suggested next best action, draft personalization, call summary, risk flags, objection trends, coaching prompts - with human review.	Experiment framework, predictive scoring, conversion forecasting, attribution, sequence performance, and cohort analysis.
		Definition of useful: ProjectLight is useful only when a rep can open one screen and know: who is this, why now, what happened, what may I do, what do I say, and what exact action is due next.	

28

CRM DATA MODEL, FIELDS, AND PERMISSIONS

| Build the source of truth before building automations

Object	Purpose	Required links / fields
Lead / Contact	Person identity and communication eligibility.	Name, role, company, email, phone, timezone, source IDs, status, owner, consent/suppression.
Account	Company context and duplicate prevention.	Legal/display name, domain, size/segment, current tools, locations, owner, open opportunities.
Opportunity	Commercial buying journey.	Stage, priority, fit, pain/impact/outcome, stakeholders, decision process/date, offer version, forecast.
Source Event	Immutable proof of why the record exists.	Platform, event ID, timestamp, form/version, campaign/ad/creative/UTM, raw payload, permission evidence.
Activity	Calls, SMS, email, DMS, notes, replies, meetings.	Actor, channel, timestamps, direction, message/call ID, delivery, disposition, related objective.
NEXT Action / Task	One owned future commitment.	Type, owner, due date/time, purpose, intended outcome, priority, status, completion evidence.
Consent / Suppression	Channel eligibility and revocation.	Channel, purpose, source/text/version/time, evidence, expiration if applicable, opt-out/DNC/bounce.
Meeting	Calendar state and outcome.	Event ID, host, attendees, timezone, type, join/reschedule links, reminders, show/no-show, outcome.
Payment / License	Verified commercial state.	Processor/session/transaction ID, offer/terms version, amount/status, license ID, refund/cancel state.
Onboarding Handoff	Delivery continuity after sale.	CS owner/backup, kickoff event, prework, promises, risks, integrations, success outcomes, milestones.
Exception / Incident	Visible failure and corrective action.	Type, affected records, timeline, root cause, owner, due date, recovery, verification.

ROLE PERMISSIONS

Role	Can do	Cannot do without approval
Rep	Work assigned leads; send approved messages; call; update stage; create next actions; book meetings.	Change offer terms, delete audit events, override suppression, bulk export, or publish templates.
Manager	Reassign, approve exceptions, review calls, see team dashboards, return incomplete records.	Change compliance rules, payment states, or production automations alone.
RevOps	Configure data, routing, automation, templates, dashboards, integrations, and reconciliation.	Approve product claims, commercial exceptions, or legal policy.
Leadership / Product / Finance / CS	Approve their controlled areas and receive defined escalations.	Edit unrelated operational evidence or bypass handoff rules.

Save and stage gate: Open records require owner + backup + stage + priority + permission state + last disposition + exact NEXT. Closed Won remains nonterminal until onboarding is accepted and calendarized.

29

INTEGRATION AND CHANNEL SETUP

| Source adapters, sender identity, calendar, payment, and fallbacks

System / source	Implementation checklist	Failure queue owner
Meta / Instagram / Facebook	Lead form webhook, source lead ID, form/version, campaign/ad/creative, DM/comment context, permission fields, retry/idempotency.	RevOps + Marketing
LinkedIn	Lead Gen Form, campaign/form IDs, company/profile, message context, source-specific permission and dedupe.	RevOps + Marketing
TikTok / Google / YouTube	Lead form or landing event, click/UTM, campaign/ad, form proof, timestamp, identity validation.	RevOps + Marketing
Website / chat	Demo/pricing/contact events, page/referrer/session, form version, submitted permissions, transcript, bot handoff.	RevOps + Web owner
Phone / call tracking	Unique tracking numbers, inbound source, recording/consent policy, disposition, rep association, missed-call event.	Sales Ops
Email	Approved sending domain, SPF/DKIM/DMARC, sender identity, reply routing, bounce/complaint/unsubscribe, template versions.	RevOps + IT
SMS	Approved brand/use case/number, opt-in proof, HELP/STOP handling, quiet hours, delivery receipts, suppression, caps.	RevOps + Compliance
Calendar	Google/Microsoft sync, pooled hosts, buffers, timezones, event IDs, reminders, reschedule/cancel, no-show, fallback.	RevOps + Sales Manager
Checkout / payment	Session and transaction IDs, approved links, pending/failed/success/refund states, webhook signatures, idempotency.	Finance + RevOps

CHANNEL CONFIGURATION GATES

IDENTITY No channel goes live until sender name, reply path, ownership, and support path are clear.	PERMISSION Store what the prospect saw and submitted; do not infer SMS permission from a phone number.	TIME Internal SLA uses America/Chicago. Customer contact uses recipient-local rules and policy.
STOP Reply, booking, payment, opt-out, bounce, complaint, or live rep activity can pause/replace automation.	CAP One objective owner, global frequency limits, and a 30-minute no-answer dedup window.	FALLBACK Every connector has retry, dead-letter queue, alert, manual continuation, and reconciliation.

Launch evidence: For every integration, retain a passing test record, source payload, created CRM record, message/event IDs, expected task, expected alert, and cleanup/replay evidence.

30

ROUTING, CAPACITY, SLA, AND ALERT CONFIGURATION

| The queue should know who can act before the lead arrives

ROUTING DECISION ORDER

1	Eligibility	Validate identity, source, permission, contact time, and required data. Invalid/ambiguous routes to review.
2	Priority	P0 verified purchase; P1 form/demo/pricing/checkout; P2 active social/referral; P3 nurture/content.
3	Specialty	Match segment, geography, language, partner, account owner, product/technical need, and conflict rules.
4	Availability	Use live status, schedule, PTO, meeting blocks, current P0/P1 load, and maximum concurrent leads.
5	Assignment	Assign primary + backup + manager; preserve original owner/source; start acceptance and response clocks.
6	Fallback	Unaccepted, unavailable, or at-risk leads move to backup/round-robin without resetting the source timestamp.

ALERT LADDER AND REQUIRED ACTION

Time / condition	ProjectLight action	Human response
T+0	Create/merge; assign; alert rep + backup + manager; create First Call; send eligible acknowledgment.	Rep accepts and reviews context.
T+5 unaccepted	Push reminder; display countdown; notify backup.	Primary accepts or backup prepares.
T+15 no human attempt	Yellow manager warning; show capacity/availability and one-click reassign.	Manager confirms owner and removes blocker.
T+25 no human attempt	Red alert to manager + backup; freeze new P1 assignment to overloaded rep if configured.	Backup takes lead or manager reassigns.
T+30 breach	Mark breach; reassign; notify leadership; require breach reason and customer recovery action.	New owner attempts immediately; manager opens incident if systemic.
T+45 unresolved	Critical incident; page on-call leadership/RevOps; list every affected lead.	Pause broken workflow if needed; run emergency queue.
Overdue NEXT	Red queue immediately; manager after 15 minutes; capacity/fallback rules apply.	Complete, reschedule with buyer evidence, or reassign.
No owner / missing NEXT	Block save/stage or create integrity exception; manager alert.	Correct before other work is considered complete.

Late-day staffing rule: A 4:59 PM Central lead has a 5:29 PM deadline. Staff closing coverage through 5:30 PM or change the published eligibility window. Never hide an impossible SLA inside the CRM.

31

PROJECTLIGHT ACTIONS BY STAGE - INBOUND TO DEMO

| What the CRM does, what the rep does, and what the manager watches

Stage	ProjectLight CRM must do	Sales rep must do	Manager control / exit evidence
NEW - UNWORKED	Create/merge; assign owners; calculate SLA; acknowledge if eligible; create First Call; start alerts.	Accept, review source, call within SLA, log disposition and exact NEXT.	No unassigned/missing NEXT; exit only after tracked human attempt.
ATTEMPTING CONTACT	Run approved cadence; schedule call/email/SMS tasks; pause on reply/booking; monitor caps and channel eligibility.	Personalize each touch; change angle, not just wording; keep next attempt dated.	Watch repeated no-answer, invalid data, collisions, and overdue attempts.
CONNECTED - QUALIFYING	Pause generic chase; create live conversation task; surface discovery fields and approved script prompts.	Set up-front contract; diagnose current state, problem, impact, outcome, fit, timing, stakeholders, and decision path.	Exit requires meaningful notes plus booked demo/callback or truthful disqualification/nurture.
DEMO SCHEDULED	Create event; store event ID; send confirmation/reminders; create prep task; suppress booking CTAs.	Confirm attendees, purpose, agenda, priority workflows, decision objective, and invite receipt.	Accepted calendar event, right attendees, and prep complete; no stale tentative meetings.
NO-SHOW	Cancel old reminder state; create rescue task; trigger permitted rescue SMS/email after human call; offer rebook.	Call within 5 minutes; use empathy; offer two replacement times; log reason.	Second no-show requires manager review and different commitment strategy.

STAGE-ENTRY AUTOMATION CHECKS

WHY NOW? Source event and requested outcome are visible to the rep.	MAY WE? Channel permission, timezone, and suppression are evaluated before send.	WHO OWNS? Primary, backup, manager, and capacity state are explicit.	WHAT NEXT? One exact action, due time, and intended outcome exist.
---	--	--	--

Manager coaching trigger: When a rep connects but does not book a next step, ProjectLight creates a coaching flag: Was the pain unclear, the value weak, the decision process unknown, or the ask missing?

32

PROJECTLIGHT ACTIONS BY STAGE - DEMO TO ONBOARDING

Every commercial stage has an evidence-based exit

Stage	ProjectLight CRM must do	Sales rep / owner must do	Manager control / exit evidence
DEMO / DISCOVERY COMPLETE	Open recap template; require pains, impact, desired outcome, workflows shown, feature status, objections, stakeholders, decision date.	Send personalized recap within 2 hours; confirm what matters; book decision/commercial review.	No "great demo" stage movement without a dated decision step.
COMMERCIAL REVIEW	Attach approved offer/terms version; track recipients, questions, exceptions, and decision meeting.	Review value and scope; label active/beta/roadmap/excluded; ask what must be resolved for a decision.	Any discount/exception requires approval and written record.
CHECKOUT / AGREEMENT SENT	Track secure link, session status, agreed decision time; create payment follow-up; stop duplicate offers.	Stay available; clarify process/approver/terms/technical blocker; never collect card data in messages.	Aging beyond agreed date triggers manager review; payment pending is not Closed Won.
PAYMENT VERIFIED	Use unique transaction; mark Closed Won; stop presale; create customer/license; alert AE/manager/Finance/CS/leadership; create onboarding workflow.	Thank buyer; confirm admin/contact; offer two onboarding times; complete handoff.	Closed Won incomplete until CS accepts and kickoff is booked or a buyer-driven exception is owned.
NURTURE	Assign reason-based journey; schedule value touches; monitor engagement; rescore/reactivate on high-intent events.	Send useful, relevant content; honor timing; keep one future NEXT.	Quarterly review of stale nurture, product gaps, and reactivation performance.
CLOSED LOST	Require reason, competitor/alternative, decision date, learning, and allowed reactivation rule; suppress active chase.	Close respectfully; confirm whether future contact is wanted; leave the relationship stronger.	Manager reviews losses for controllable patterns and false "unresponsive" reasons.

Automation principle: ProjectLight should automate consistency, not persuasion. A reply, objection, commercial question, or buying signal creates a human task and pauses generic outbound until the owner responds.

33

14-DAY ACTIVE CONTACT CADENCE

| One coordinated sequence with a clear purpose at every touch

Step	Timing	Channel	Objective / message angle	Required NEXT / ProjectLight action
1	T+0	Email + eligible SMS	Acknowledge request, identify rep, set expectation, offer two times.	Create First Call due inside SLA; log message IDs.
2	T+5-20	Call #1	Source-aware opening; discover what caught attention; book fit/demo.	Disposition + exact NEXT before task closes.
3	After no answer	Voicemail + SMS #2 + Email #2	Human missed-call message and easy reply path.	Schedule Call #2; 30-minute dedup prevents message burst.
4	T+3-5 hours	Call #2	New time window; ask one direct, relevant question.	Connect/book or schedule Day 2 call.
5	Day 2 AM	Call #3 + SMS #3	Value hypothesis: owner/next-action visibility, follow-up, operations, or prelaunch access.	Personalize track based on response/engagement.
6	Day 2 PM	Email #3	Short diagnostic and one useful insight; invite 10-minute fit check.	Create Day 4 task; pause if reply.
7	Day 4	Call #4 + SMS #4	Clarify priority: this month, later, or not now.	Book, nurture with date, or continue.
8	Day 5	Email #4	Decision checklist / what good follow-up operations require.	Track click/reply; no score-only automation sends.
9	Day 7	Call #5 + Email #5	Business case, stakeholder, and next-step clarity.	Set decision/demo or explicit later date.
10	Day 9	SMS #5	Low-friction choice: fit check, overview, or close loop.	Reply pauses sequence and alerts owner.
11	Day 10	Call #6 + Email #6	Ask what remains unresolved; offer two concrete paths.	Manager review if high intent but no next step.
12	Day 12	SMS #6	Permission-based final active check.	Set final call task or nurture date.
13	Day 14	Call #7 + Email/SMS breakup	Respectful close-the-loop; 1=book, 2=later, 3=close.	Move to Nurture or Closed Lost with reason and future NEXT.

Sequence stop rules: Stop or replace generic steps on reply, booked meeting, buyer-requested callback, opt-out, invalid channel, payment, customer status, live rep activity, or a higher-priority service issue. Never let automation argue with a human.

34	CALL SEQUENCE - ATTEMPTS 1 THROUGH 3 Open warm, stay human, and earn the next conversation
	SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.
CALL #1 - SPEED TO LEAD <i>Warm, upbeat, unhurried. Smile and stand.</i>	Rep: 'Hey [First Name], this is [Rep] with Lynked Up Pro. You just [filled out the form / messaged us] about [source topic]. Did I catch you with two minutes?' If YES: 'Perfect. I do not want to launch into a pitch. What caught your attention enough to reach out today?' [Pause. Listen. Reflect one phrase.] 'Got it. How are you handling that today?' If BUSY: 'Totally fair. I can be brief, or we can lock a better time. Is [Time A] or [Time B] easier?' Book live. If WHAT IS THIS ABOUT?: 'You asked about Lynked Up Pro and the Prelaunch License. I want to see whether the platform fits the way your team actually sells and runs work - and tell you quickly if it does not.'
VOICEMAIL #1 <i>12-20 seconds. Friendly, not dramatic.</i>	'Hey [First Name], [Rep] with Lynked Up Pro. I am following up on your [form/message] about [topic]. I will send a quick text so you have my number. Call or text me when convenient - [number].'
CALL #2 - SAME DAY <i>Different angle. Do not repeat Call #1 word for word.</i>	'Hey [First Name], [Rep] again. I wanted to try you at a different time. Your request mentioned [topic]. Usually that means a team is trying to fix either missed follow-up, lack of visibility, or too many disconnected tools. Which one is closest - or am I off?' If they answer: explore one implication, then: 'That is worth a real look. Would [Time A] or [Time B] work for a focused conversation?'
CALL #3 - DAY 2 <i>Calm confidence. Offer value before another ask.</i>	'Hi [First Name], [Rep] with Lynked Up Pro. One reason I kept this on my list: when leads, follow-up, and project handoffs live in separate places, the leak is usually invisible until revenue is gone. Is that a problem you are actively trying to solve, or was your inquiry more exploratory?' If ACTIVE: ask impact + desired outcome and book. If EXPLORATORY: offer the two-minute overview and set a dated check-back. If NOT A FIT: thank them and close cleanly.'
	After every attempt: Log outcome, voicemail yes/no, objection or signal, and the exact next action. "Tried calling" is not a complete CRM record.

35

CALL SEQUENCE - ATTEMPTS 4 THROUGH 7

| Change the reason for the call, not just the day

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

Attempt	Human talk track	Required next action
CALL #4 - DAY 4	'Hey [First Name], quick check so I follow your lead. Is improving [known problem] a this-month priority, a later-this-quarter priority, or not something you want to pursue right now?' [Let them choose. Do not rescue the silence.]	Book a fit/demo, set a buyer-approved future date, or document not-now reason.
CALL #5 - DAY 7	'I have been thinking about what you shared/requested. The real question is not whether another CRM has features - it is whether your team will know who owns every lead and what happens next. Would it be useful to map that workflow for 15 minutes?'	Book workflow review; add stakeholder/decision task.
CALL #6 - DAY 10	'I do not want to keep guessing. What is the main thing stopping this from moving forward: timing, trust in a prelaunch platform, budget, another decision-maker, or simply not enough value yet?'	Answer/verify one blocker; schedule decision or close loop.
CALL #7 - DAY 14	'I promised myself I would not become the rep who follows up forever without permission. Should we book a conversation, revisit on a specific date, or close this out for now?'	1=book; 2=nurture with exact date/reason; 3=Closed Lost / no active chase.
REACTIVATION - DAY 30+	'Hey [First Name], we spoke/reached out around [month] about [problem]. I am calling because [relevant update / timing event]. Has anything changed in how you are handling [problem]?'	If new signal exists, move to Connected and book. Otherwise set next nurture or close.

VOICEMAIL PROGRESSION

VOICEMAIL #2

Make the reason specific.

'Hi [First Name], [Rep] with Lynked Up Pro. I am reaching out because you asked about [topic], and I have one question about how your team handles [problem]. I will text it as well. My number is [number].'

FINAL ACTIVE VOICEMAIL

Respectful and low pressure.

'Hey [First Name], [Rep] with Lynked Up Pro. I am going to move this out of my active follow-up so I do not create noise. I will send a quick message with three options: talk now, revisit later, or close the loop. Either way, thank you for checking us out.'

Demeanor: Positive energy is not pressure. Sound like a capable human who is happy to help, comfortable with a no, and genuinely interested in the answer.

36

SMS SEQUENCE - MESSAGES 1 THROUGH 5

| Short, personal, permission-aware, and tied to one action

# / trigger	Approved starting template	ProjectLight next action
SMS 1 - Immediate inbound	Hi [First Name] - [Rep] with Lynked Up Pro. I just received your [form/message] about [topic]. I will call from [number] shortly. Is now okay, or is [Time A]/[Time B] better? Reply STOP to opt out.	Log send ID; create First Call inside SLA. If reply, pause sequence and alert rep.
SMS 2 - Missed Call #1	Hi [First Name], I just tried you. No pressure - what caught your eye most: 1) lead follow-up, 2) sales visibility, 3) project operations, or 4) the Prelaunch License? - [Rep] [Link]	If SMS 1 sent within 30 minutes, delay/consolidate. Schedule Call #2.
SMS 3 - Day 2 value question	Quick thought: most teams do not need another app - they need every lead to have an owner and a next action. Is follow-up the main issue for you, or something else?	Reply creates urgent human task. No reply -> Day 2 email and Day 4 call.
SMS 4 - Day 4 priority check	I want to follow your lead, [First Name]. Is solving [known problem] a this-month priority, later this quarter, or not right now?	Book, set dated nurture, or continue based on buyer response.
SMS 5 - Day 9 low-friction choice	What would be most useful? A = 10-minute fit check, B = 2-minute overview, C = close the loop for now. - [Rep]	A/B/C disposition updates stage and exact NEXT automatically.

PERSONALIZATION RULES

USE SOURCE Reference the actual form, DM, referral, event, or checkout - never pretend familiarity.	ONE QUESTION Ask one easy-to-answer question, not a paragraph of discovery.	ONE CTA Call, reply, choose A/B/C, or book - never four competing actions.	STOP FAST Any opt-out, complaint, invalid number, or channel restriction suppresses queued texts.
---	---	--	---

SMS approval gate: These are operating templates, not legal approval. Production eligibility, required disclosure, quiet hours, sender identity, and opt-out handling must follow counsel-approved policy and current carrier/platform requirements.

37

SMS SEQUENCE - MESSAGES 6 THROUGH 10

| Close the active loop, then reactivate with a real reason

# / trigger	Approved starting template	ProjectLight next action
SMS 6 - Day 12 permission check	Last active check from me, [First Name]: should I keep working to connect, circle back on a specific date, or close this for now? - [Rep]	Create final-call task; reply pauses sequence.
SMS 7 - Day 14 breakup	Should I keep this active? Reply 1 = book a conversation, 2 = revisit later, 3 = close the loop. Either answer is helpful. - [Rep], Lynked Up Pro	1=book; 2=require date/reason; 3=Closed Lost; no reply -> reason-coded nurture.
SMS 8 - Day 30 reactivation	Hi [First Name] - [Rep] with Lynked Up Pro. We spoke/reached out about [problem]. [Relevant update/timing reason]. Has anything changed on your side?	High-intent reply reopens opportunity and creates same-day call.
SMS 9 - Checkout assistance	I sent the approved Lynked Up Pro license terms and secure checkout. What question needs to be resolved before [agreed decision time]? - [Rep]	Create payment/decision task; do not mark Closed Won until verified.
SMS 10 - Closed Won	Welcome to Lynked Up Pro, [First Name] - payment is confirmed. Your next step is onboarding with [Owner]. I can book it with you now, or use: [Link].	Stop presale; assign CS; onboarding event or owned exception due within 24 hours.

LIFECYCLE SMS LIBRARY

Trigger	Message
Demo booked	You are set for Lynked Up Pro on [Day] at [Time] [TZ]. We will focus on [priority]. Join: [Link] Reschedule: [Link].
2-hour reminder	Looking forward to our call at [Time] [TZ]. We will keep it focused on [priority]. Join: [Link].
No-show rescue	Hi [First Name], we missed you. No worries. Would [Time A] or [Time B] work, or use [Link]?
Callback confirmed	Confirmed - I will call [Day] at [Time] [TZ] from [number]. Reply here if anything changes.
Payment failed/pending	It looks like checkout did not complete. I can help with the process, but please do not send payment details by text. Secure link: [Link].

Reply handling: Any reply becomes a priority owner task. The human response target during staffed hours is 5 minutes. Generic persuasion pauses while a real conversation is active.

38

EMAIL SEQUENCE - MESSAGES 1 THROUGH 4

| Every email advances one decision, not five

EMAIL 1 - IMMEDIATE ACKNOWLEDGMENT

Subject: Got your Lynked Up Pro request

Hi [First Name],

Thanks for reaching out about [source/topic]. I am [Rep], and I will call shortly from [number]. Before I do, what are you most interested in improving: lead follow-up, sales visibility, project operations, or learning about the Prelaunch License?

A quick conversation is usually the fastest way to tell whether there is a fit. Is [Time A] or [Time B] better?

[Rep] | [Phone] | [Calendar]

EMAIL 2 - MISSED CALL

Subject: I just tried you

Hi [First Name],

I just tried to reach you about your Lynked Up Pro [form/message]. No worries if the timing was bad. I wanted to understand what caught your attention and whether it is worth a focused conversation.

Reply with the best time, choose [Time A] or [Time B], or use [Calendar].

[Rep]

EMAIL 3 - DAY 2 VALUE HYPOTHESIS

Subject: Where leads usually get lost

Hi [First Name],

A common problem is not a lack of effort. It is that lead ownership, follow-up, messages, appointments, and project handoffs live in different places - so no one sees the leak soon enough.

Lynked Up Pro is designed around a simple standard: every lead has an owner and a next action. Is that close to the problem you are trying to solve?

A 10-minute fit check should be enough to know. [Time A] or [Time B]?

[Rep]

EMAIL 4 - DAY 5 DIAGNOSTIC

Subject: Five questions for a leak-proof sales workflow

Hi [First Name],

Here are five questions worth asking:

1. Does every new lead receive an owner and due time automatically?
2. Can leadership see overdue follow-up without asking?
3. Do email, SMS, calls, and calendar live on one timeline?
4. Does a no-answer outcome create the next action automatically?
5. Does Closed Won immediately schedule onboarding?

Which one is hardest today? Reply with the number, and I will show you the relevant workflow.

[Rep]

After each send: ProjectLight logs template version, personalization, message ID, delivery, reply, link activity, and the next human task. Opens/clicks may inform priority but never replace a real buying signal.

39

EMAIL SEQUENCE - MESSAGES 5 THROUGH 8

| Ask for clarity, then earn the right to re-engage

EMAIL 5 - DAY 7 BUSINESS CASE

Subject: What would need to change for this to matter?

Hi [First Name],

I do not want to assume software is the answer. The useful question is: what would have to change in your current process for a new platform to be worth the effort?

For example: faster lead response, fewer missed follow-ups, clearer rep accountability, smoother sales-to-project handoff, or better owner visibility.

Which outcome matters most - and by when?

[Rep] | [Calendar]

EMAIL 6 - DAY 10 DECISION PATH

Subject: What is still unresolved?

Hi [First Name],

I have tried to connect because you showed interest in Lynked Up Pro. Rather than keep guessing, which of these is the real blocker?

- A. Timing
- B. Budget or approval
- C. Trust in a prelaunch platform
- D. A feature or integration
- E. Not enough value / not a fit

Reply with a letter. I will either answer it directly, set a better date, or close the loop respectfully.

[Rep]

EMAIL 7 - DAY 14 BREAKUP

Subject: Should I keep this active?

Hi [First Name],

I do not want to create noise. Which is most accurate?

- 1 - Book a conversation
- 2 - Revisit on a specific date
- 3 - Close the loop

Reply with 1, 2, or 3. If I do not hear back, I will move this out of the active follow-up queue and only reconnect when there is a relevant reason.

[Rep]

EMAIL 8 - DAY 30 REACTIVATION

Subject: Has anything changed with [problem]?

Hi [First Name],

We connected/reached out around [month] about [problem]. I am checking back because [specific update, new capacity, product status, timing event, or buyer-requested date].

Has anything changed in how you are handling [problem]? If it is worth revisiting, I can hold [Time A] or [Time B]. If not, no problem.

[Rep]

Email quality check: Accurate subject, real sender, approved signature/address/unsubscribe controls, buyer-specific context, one CTA, no invented urgency, and a next action in ProjectLight.

40

FIRST-CALL HUMAN CONVERSATION PLAYBOOK |

Energy, tone, branches, and a clean next step

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

BODY

Stand or sit tall. Smile before dialing. Keep your hands relaxed.

TONE

Warm, confident, curious. Never rushed, defensive, or overly familiar.

PACE

Slow down after questions. Let silence do work. One question at a time.

MINDSET

Your job is not to force a yes. It is to create clarity and the right next step.

OPEN

Source-aware and permission-based.

'Hey [First Name], this is [Rep] with Lynked Up Pro. You [filled out / messaged / were referred] about [specific topic]. Did I catch you with two minutes?'

Buyer response

Rep response and delivery

"Yes / sure."

'Awesome - thank you. I do not want to assume. What caught your attention enough to reach out?' [Curious tone. Stop talking.]

"I am busy."

'Totally fair. I can be brief, or we can put a real time on the calendar. Is [Time A] or [Time B] better?' [Helpful, not apologetic.]

"What is this about?"

'You asked about Lynked Up Pro / the Prelaunch License. I want to see whether it fits the way your team handles [source topic] and tell you quickly if it does not.'

"Just send information."

'Happy to. So I send the right thing instead of a generic deck, is the bigger issue follow-up, visibility, operations, or the license itself?'

"How much is it?"

'I will give you the current approved terms. First, may I ask two quick questions so I do not quote the wrong fit or make assumptions about what you need?'

"Not interested."

'Understood. Before I close it, was the timing wrong, the problem not important, or did something about Lynked Up Pro miss the mark?' [Respect the answer.]

TRANSITION

Earn discovery.

'Based on what you said, it sounds like [summary in buyer words]. Would it be okay if I ask a few questions about how that works today, then I can tell you whether a deeper demo makes sense?'

End every live call: Summarize what you heard, state the agreed next step, book it live, verify the invite, and tell the buyer exactly what will happen next. Then update ProjectLight before starting another task.

41

DISCOVERY AND QUALIFICATION SCRIPT

| Diagnose before you demonstrate

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

UP-FRONT AGREEMENT

Set mutual expectations.

'We have about [15/20] minutes. I would like to understand how you handle leads and work today, where the friction is, and what you want to improve. If there is a fit, we will agree on a useful next step. If there is not, we can say that honestly. Sound fair?'

Discovery area	Primary questions	Listen for / record
Trigger / why now	"What happened that made this worth looking at now?" "What caught your attention?"	Event, urgency, initiative, failure, growth, buyer emotion.
Current state	"Walk me through a lead from first inquiry to closed job." "What systems and handoffs are involved?"	Tools, people, steps, delays, workarounds, ownership.
Problem	"Where does that process break down?" "What is hardest to see or control?"	Missed follow-up, slow response, duplicate work, unclear accountability.
Implication	"When that happens, what does it cost - time, jobs, cash flow, trust, or management attention?"	Business impact, frequency, examples, consequence of no change.
Desired outcome	"Six months from now, what must be different for this to be a win?"	Measurable outcome, user adoption, owner visibility, timing.
Priority / timing	"Why solve it now instead of later?" "Is there a date or event driving this?"	Decision date, launch, season, contract, growth target.
Decision process	"Who else needs to be comfortable?" "What criteria will you use?" "How does approval happen?"	Economic buyer, users, technical/finance, steps, alternatives.
Investment path	"How do you normally evaluate and fund a system like this?"	Budget source, willingness, implementation resources - no premature discounting.
Risk / prelaunch	"What would make you hesitant about joining before full launch?"	Trust, support, roadmap, migration, adoption, terms.
Success / commitment	"If we can prove [outcome], what would the next decision step be?"	Mutual action and specific next meeting.

SUMMARY CHECK

Mirror their words; invite correction.

'Let me make sure I have this right. Today [current state]. The biggest problem is [problem], which causes [impact]. You want [desired outcome] by [timing], and [stakeholders/process] will be involved. What did I miss or get wrong?'

Qualification result: Advance only when there is a real problem, plausible fit, credible timing, decision path, and mutually agreed next step. Otherwise nurture or close with respect.

42

DEMO AND VALUE-MAPPING SCRIPT

| Show the workflow that solves the problem - not every feature

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

30-MINUTE DEMO FLOW

0-3	Reconnect	Confirm time, attendees, purpose, and what changed since discovery.
3-6	Reframe	Restate current state, business impact, desired outcome, and decision objective.
6-21	Show	Demonstrate no more than three workflows tied directly to the buyer's problems.
21-25	Verify	Ask what fits, what does not, and what concern remains.
25-28	Commercial	Review approved offer/scope/status only if the value and fit are clear.
28-30	Advance	Book decision/checkout/onboarding step live; state owners and date.

OPENING

Set a decision objective.

'We planned 30 minutes. I will start by confirming what I heard, then show the workflows tied to [problem 1] and [problem 2]. I will not try to show everything. At the end, we should know whether to move forward, identify a gap, or stop. Fair?'

Demo moment

Human language

Before a workflow

'You said [problem] happens when [current state]. Let me show you how ProjectLight is intended to handle that.'

After a workflow

'How would this change the way your team works today?' Then pause. Do not answer for them.

Value check

'Where would this create the most value: speed, accountability, visibility, handoff, or something else?'

Feature status

'This is [active / beta / configuration-dependent / roadmap / excluded] under the current approved offer. I do not want to blur that line.'

Gap

'That requirement matters. I do not want to guess. I will verify with Product and answer in writing by [time].'

Transition to decision

'Based on what we reviewed, what would keep this from moving to [decision / checkout / stakeholder review]?'

DEMO PREP AND CRM EVIDENCE

- Know the source, pains, impact, desired outcome, current tools, attendees, decision date, open questions, and feature-risk labels.
- Use a clean demo environment and a pre-tested path. Never improvise production behavior or expose another customer's data.
- After the demo, record workflows shown, reactions, value language, objections, feature status, decision process, and exact next meeting.

43

OBJECTION HANDLING LIBRARY

| LACE: Listen, Acknowledge, Clarify, Execute a next step

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

Objection	Human response	Next action
"It is too expensive."	"It sounds like the investment is not yet justified by the value you see. Is the concern the amount, the timing, or confidence that [outcome] will happen?" Then quantify the problem and compare only to approved terms.	Resolve value/scope; book decision; no unapproved discount.
"I need to think about it."	"Absolutely. Usually 'think about it' means a question is still unresolved. What specifically do you need to become comfortable with?"	Name question, owner, decision date, and next meeting.
"Send me information."	"Happy to. To avoid sending a generic pile, what question should the information help you answer?"	Send one relevant asset; set 10-minute review time.
"We already have a CRM."	"That may be the right answer. What does it do well, and where does your team still work around it?"	Identify gap/fit; do not attack competitor.
"We are too busy."	"That makes sense. Is the busyness a reason to wait, or part of the problem you need the system to reduce?"	Offer short fit call or buyer-selected future date.
"Prelaunch feels risky."	"That is a fair concern. What risk matters most: reliability, support, roadmap, data, adoption, or the commercial terms?"	Answer with approved evidence; document gap; schedule risk review.
"I need my partner/team."	"Of course. What will they care about most, and can we include them so you are not carrying the whole explanation?"	Book stakeholder meeting; send tailored recap.
"We need [roadmap feature]."	"I do not want to sell you a future promise. Today that is [status]. Is it a must-have for purchase, or could the current workflow solve enough value without it?"	Record dependency; Product answer in writing; qualify honestly.
"Not now."	"Understood. What would need to happen for this to become relevant - and when should I check back?"	Nurture reason + exact date/event.
"No."	"Thank you for being direct. Was it fit, timing, trust, investment, or something we could have handled better?"	Close Lost with learning; respect contact preference.

What not to do: Do not interrupt, debate, minimize, stack features, create fake urgency, promise roadmap dates, or keep talking after the buyer has answered. Curiosity first; evidence second; next step third.

44

CLOSE, CHECKOUT, AND PAYMENT SCRIPTS

| Make the decision easy to understand and safe to complete

SALES SCRIPT HEADER: This person you're talking to could take you one step closer to your goals. Be excited and go crush it! Be curious. Be useful. Have fun.

DECISION CHECK

Calm, direct, no pressure.

'We agreed the main problem is [problem], the impact is [impact], and the outcome you want is [outcome]. Based on what you have seen, does Lynked Up Pro feel like the right next step, the wrong fit, or is one condition still unresolved?'

Situation	Human talk track	ProjectLight next action
Ready to buy	'Great. I will send the approved terms and secure checkout now. Let us stay together while you review it so I can answer questions. I will never ask for card details by phone, text, email, or CRM note.'	Send versioned offer/link; track session; set payment review task.
One condition remains	'Let us make that specific. What answer or evidence do you need, who owns it, and by when should we reconvene?'	Create named blocker task + decision meeting.
Needs stakeholder	'Rather than have you resell it internally, let us bring [role] into a focused 20-minute review. Is [Time A] or [Time B] better?'	Book stakeholder decision event.
Checkout started	'I saw the checkout begin. Was the blocker the process, the terms, an approver, or a technical issue?'	Payment Assistance; no duplicate pressure.
Payment failed/pending	'It looks like the payment did not complete. I can help with the process, and Finance can verify the status. Please do not send any payment details in ordinary messages.'	Keep Payment Pending; secure recovery path; Finance alert.
Direct online purchase	'Welcome - and thank you for trusting us early. Payment is verified. The next win is getting onboarding on the calendar so your team has a clear start.'	Closed Won; stop presale; confirm admin; book onboarding.
No decision	'A maybe without a date is hard for both of us. Should we set a real decision time, move this to a later date, or close it for now?'	Decision date, nurture date, or Closed Lost.

Commercial truth: Use only the current approved Offer Data Sheet: price, limits, included features, usage/third-party charges, rollout, refund/cancellation, scarcity, support, and feature status. If unsure, verify in writing.

45

CALENDAR, NO-SHOW, AND ONBOARDING SCRIPTS

| Book live, confirm purpose, and make every meeting earn its place

Moment	Human script / customer message	ProjectLight action
Book live	"The useful next step is [meeting purpose]. I have [Time A] or [Time B] in your timezone. Which works better?" Create event while speaking and verify receipt.	Create event ID; attendees; purpose; source opportunity; prep task; NEXT = meeting.
Invite description	Purpose: confirm [problem/outcome]. Agenda: current workflow, relevant Lynked Up Pro workflow, open risks, decision/next step. Bring: [stakeholders/data].	Versioned meeting template; correct join/reschedule/cancel links.
24-hour reminder	"Looking forward to tomorrow at [time]. We will focus on [priority]. Please include [stakeholder] and bring [item] if available."	Send reminder; create rep prep task; check acceptance.
1-hour reminder	"Reminder: Lynked Up Pro at [time] [TZ]. Join: [link]. We will keep it focused on [priority]."	Suppress if canceled/rescheduled; alert rep.
No-show call	"Hey [First Name], I had us down for [time] and wanted to make sure everything is okay. No problem if the day got away from you. Is [Time A] or [Time B] easier?"	Call within 5 minutes; mark No Show; cancel old reminders; create rebook.
No-show message	"We missed you - no worries. Would [Time A] or [Time B] work, or use [link]? I will keep the next conversation focused on [priority]."	Permitted SMS/email after human attempt; second no-show flags manager.
Reschedule	"Confirmed for [new time] [TZ]. The previous invite is canceled. Purpose remains [purpose]."	One active event ID; regenerate reminders; preserve history.
Onboarding booking	"Welcome to Lynked Up Pro. The next step is a 60-minute kickoff with [CS owner] to confirm users, priorities, integrations, timeline, training, and success measures. Is [Time A] or [Time B] better?"	Assign CS + backup; create handoff; event due within 24 hours.

ONBOARDING INVITE CHECKLIST

WHO Admin, decision-maker, key users, sales rep, CS owner, technical contact when needed.	WHY Customer problem, desired 90-day outcome, commitments, limitations, and risks.	WHAT Users, roles, data, integrations, workflow priority, training, milestones, next meeting.	WHEN Confirmed event within 24 hours of payment or buyer-driven exception with owner/date.
---	--	---	--

46

LONG-TERM NURTURE AND REACTIVATION

| Stay relevant without becoming noise

Nurture reason	Cadence and content	Reactivation trigger / NEXT
Timing / season	Buyer-approved date; 30-60 day value touch; 14 days before event; one confirmation.	Calendar/date arrives, seasonal event, or inbound engagement -> same-day owner task.
Budget / approval cycle	Useful business-case asset, planning reminder, and stakeholder prep - not repeated discounting.	Budget window, approval meeting, or buyer reply -> decision call.
Current contract / tool	Check 90/60/30 days before renewal; send migration/transition questions.	Renewal window -> discovery refresh and stakeholder map.
Product / integration gap	Only verified status updates; no vague "coming soon" messages.	Product-approved status materially changes -> owner reviews fit before contacting.
Trust / prelaunch risk	Proof, process transparency, support/onboarding clarity, and updated terms when approved.	New evidence, reference permission, or buyer-requested date -> risk review.
No response after active cadence	Day 30, 60, 90, then quarterly max unless engagement. Change the reason, not just the subject line.	Reply, pricing/demo visit, form, DM, checkout, or referral -> rescore/reactivate.
No fit today	Do not nurture unless a specific future change could create fit and contact is permitted.	Material fit change only; otherwise Closed Lost remains closed.

NURTURE MESSAGE STARTERS

Timing	Message starter
Day 30	"You asked about [problem] last month. Has the priority changed, or is [agreed timing] still the right window?"
Day 60	"A useful question for teams evaluating CRM: who can see every overdue next action today? Has that become easier or harder?"
Day 90	"We have an update related to [verified relevant area]. It may or may not change fit. Worth a 10-minute revisit?"
Quarterly	"Checking in for the reason we agreed: [reason/event]. Should we revisit, move the date, or close the loop?"

Nurture standard: Every nurture record still has one owner and one dated next action. A nurture list without reason, permission, relevance, and a future event is a forgotten-lead warehouse.

47

MANAGER DASHBOARD, ALERTS, AND COACHING

| Manage outcomes, exceptions, and behavior - not activity theater

Dashboard / KPI	Required view	Manager action
P0/P1 live queue	Unassigned, unaccepted, countdown, at-risk, breached, capacity, source, owner/backup.	Intervene before breach; reassign; document systemic causes.
Next-action coverage	Percent and count missing/overdue by rep/stage/source; repeated date pushes.	Correct daily; coach exact next-action quality.
Response performance	Median/P95 time, 30-minute attainment, late-day/after-hours, exception reasons.	Fix staffing/routing; never blame reps for impossible coverage.
Connect / book / show	By source, campaign, form, rep, segment, time window, attempt number.	Find quality, opening, cadence, and calendar problems.
Stage conversion / aging	Connected->demo->commercial->checkout->won, age, decision date, losses.	Coach discovery/decision; clean false pipeline.
Messaging health	Delivery, reply, bounce, complaint, opt-out, invalid, duplicate suppression, channel caps.	Pause broken sender/sequence; protect permission and reputation.
Payment / onboarding	Started/pending/failed/verified; time to kickoff; incomplete handoffs; promises/risks.	Escalate blocked revenue and customer-start risk.
Source economics	Lead, appointment, show, close, revenue, cost and quality where available.	Shift spend only after data and operational quality are validated.

15-MINUTE COACHING LOOP

2 min	Rep	State the call objective and self-score one strong moment and one missed moment.
4 min	Listen	Review one exact segment. Manager asks what the buyer said and what it meant.
4 min	Coach	Choose one behavior: opening, question, pause, empathy, value, truth, objection, or next step.
3 min	Practice	Role-play the same moment twice with buyer variation.
2 min	Commit	Set one observable behavior and the next call sample date.

Team energy: Open huddles with one customer win and one great behavior. Run "best question of the week," "cleanest next step," and "fastest save" shout-outs. Keep it competitive, useful, and fun - never humiliating.

48

REP CERTIFICATION AND FUN TEAM STANDARDS

| Confidence comes from practice, clarity, and a team that enjoys winning

Certification station	Rep must demonstrate	Pass standard
CRM hygiene	Create/merge, permission check, disposition, stage, exact NEXT, calendar, offer version, handoff.	Zero missing required fields; no duplicate/collision.
Speed-to-lead	Review context, call inside SLA, no-answer bundle, backup/escalation.	Correct sequence in timed simulation.
First call	Warm opening, permission, source awareness, curiosity, busy branch, book live.	Natural delivery; no script reading; clear next step.
Discovery	Current state, problem, impact, future outcome, timing, stakeholders, decision, investment path.	Accurate summary in buyer words; qualification decision.
Demo	Reframe, show three or fewer relevant workflows, label feature status, verify value.	No feature dumping or unapproved promise.
Objections	Price, timing, send info, existing CRM, prelaunch risk, partner, roadmap, no.	LACE; evidence; next step; comfort with no.
Close / payment	Decision check, checkout, pending/failed recovery, direct purchase, no card-data request.	Approved offer only; correct payment state.
Calendar / onboarding	Book live, invite purpose, no-show rescue, CS handoff, kickoff due.	Accepted event and complete handoff.

DAILY REP RESET - 5 MINUTES

1. GET READY Availability on, headset/phone ready, calendar open, approved offer current.	2. OWN THE QUEUE Clear overnight P0/P1 and overdue NEXT before low-priority work.	3. PICK THE WHY Know why each lead raised a hand and the one question you want answered.	4. BRING ENERGY This person could take you one step closer to your goals. Be excited and go crush it!
---	---	--	---

FUN OPERATING RITUALS

- Monday "Let's Cook" kickoff: one target, one role-play, one source campaign focus, one team reward.
- Daily win bell only after the CRM record, next action, and handoff are complete - no ghost celebrations.
- Friday call lab: best question, best recovery, best clean no, best handoff, and one funny-but-useful lesson.
- Leaderboard balances speed, quality, conversion, clean records, show rate, and onboarding - not just raw dials.

Culture standard: High standards and high energy belong together. Coach hard on process, stay respectful with people, tell the truth, celebrate progress, and make the work enjoyable.

GO-LIVE, QA, AND POST-MORTEM GAP CLOSURE

| Prove the system works before trusting revenue to it

Test / gap	Pass evidence	Owner
10:00 AM form	One record; source/consent; owner/backup; due 10:30; messages/tasks/alerts; human attempt.	RevOps + Manager
4:59 PM form	Closing coverage; due 5:29; no overnight misclassification.	Manager
After-hours / weekend / holiday	Eligible acknowledgment; priority next business day; recipient-local contact rule.	RevOps
Duplicate form + DM + webhook replay	One canonical record; events preserved; one active sequence; no duplicate sends.	RevOps
Rep unavailable / no acceptance	Backup and reassignment; original source time preserved; alerts continue.	Manager
No answer	Voicemail flag; coordinated SMS/email; dedup; exact next call.	RevOps + Manager
Reply / booking / payment / opt-out	Correct pause/replace/stop behavior across every tool.	RevOps + Compliance
Calendar reschedule / no-show	One active event; correct reminders; rescue task; no stale links.	RevOps
Payment pending / success / duplicate	No premature Close; one customer/license/welcome/onboarding.	Finance + RevOps
Closed Won incomplete	24-hour alert, CS owner, accepted event or buyer-driven exception.	CS + Manager
Open record missing NEXT	Save/stage blocked or integrity exception visible to manager.	RevOps
Provider / CRM outage	Emergency queue, manual continuity, reconciliation, no duplicate burst.	RevOps + Leadership

POST-MORTEM - 30 MINUTES, NO BLAME, NO VAGUE FIXES

5	Facts	Timeline, affected leads, customer impact, system/user events, and current containment.
5	Detection	How the problem was found; why monitoring did or did not catch it sooner.
8	Root cause	People, process, system, data, third-party, training, and policy contributors.
7	Corrective action	Immediate fix + permanent control; one owner and due date for each.
5	Verification	Acceptance test, metric, retest date, SOP/template/version update, and affected-lead recovery.

Final launch gate: Offer approved. Staffing real. ProjectLight P0 features live. Sources tested. Scripts certified. Messaging permitted. Calendar and payment proven. Dashboards reconciled. Manual fallback ready. Post-mortem booked. Then - let's cook.

GO CRUSH IT: Every lead represents a business owner, a team, and a problem they care enough to explore. Show up fast. Listen well. Tell the truth. Set the next action. Have fun winning the right way.
